

Quickstart Guide - Windows

1. Log in to both machines.
2. Turn on projectors (using the AMX touchpanel).
3. Start DTrack2 on head node.

4. Connect the Wii Remote.

Device server will auto-connect:
The Wii Remote is ready to use when the correct light is lit (1 for the white controller, 2 for the black controller) and the controller rumbles briefly.

5. Run your app!

The desktop of the render node has folders of shortcuts, including the VR JuggLua interactive interface ("NavTestbed").

6. When done, shut down in reverse order, and put accessories away in the filing cabinet.

Turn off the Wii Remote(s) by pressing and holding the power button on the controller until the light turns off. Also, please see the diagram in the cabinet drawer for how to place the Wii Remote on the charger.

7. Log off of both computers.

Switching from Windows to Linux

Close all applications, then double-click the "Reboot to Linux" icon.
Both computers will **immediately** restart.

Switching from Linux to Windows

Close everything, then in a Terminal, run:
`ssh pxe`
Both computers will **immediately** restart.
