

Quickstart Guide - Windows

1. Log in to both machines.
2. Turn on projectors (AMX touchpanel).
3. Start DTrack2 on head node.

4. Start Wiimote Wand Server on head node.

5. Run your app!

A shortcut to the VR JuggLua Nav Testbed application is on the desktop of the render node.

6. When done, shut down in reverse order, and put accessories away in the filing cabinet.
