METaL
### MULTIMODAL EXPERIENCE TESTBED AND LABORATORY

Quickstart Guide - Windows

1. Log in to both machines.

2. Turn on projectors (AMX touchpanel).

3. Start DTrack2 on head node.

4. Connect the Wii Remote.

The first light should go
solid and stay solid

press 1 and 2 on Wiimote:
lights will flash

5. Run your app!

A shortcut to VR JuggLua is on the desktop of the render node.

6. When done, shut down in reverse order, and put accessories away in the filing cabinet.

Make sure the Wii Remote is turned off before you put it away! Also, please see
the diagram in the drawer for how to place the Wii Remote on the charger.

7. Log off of both computers.

Switching from Windows to Linux	Switching from Linux to Windows
Close all applications, then double-click the "Reboot to Linux" icon.	Close everything, then in a Terminal, run: `ssh pxe`
Both computers will **immediately** restart.	Both computers will **immediately** restart.
